Moffett Poultry

The MOFFETT M9 is the only Truck-mounted Forklift specifically developed for the poultry industry. It is the perfect solution for collecting and transporting poultry between growers and the processing plant.

Rough working conditions and low working heights are no longer a challenge and livestock is handled smoothly, safely and in a shorter time than ever.

Poultry

For more than 40 years, Moffett has been manufacturing Truck-mounted Forklifts, a load handling solution that has helped transform the way materials are distributed across the globe.

Reliable in the most arduous conditions in poultry houses, the MOFFETT Truck-mounted Forklift comes with all wheel drive with differential lock for excellent traction, even in the deepest litter. The engine and hydraulic components of the M9 are protected from the dust and dirt of the poultry house, ensuring consistent performance.

The M9 is also fitted with a hydraulic oil cooler as standard to ensure reliability and the low height ensures the machines fits under feeders, drinkers and lighting.

While travelling, the poultry modules are safely positioned centrally within the machine frame, which keeps them stable and reduces damage to the livestock. A blue light reduces stress on the birds and the Triplex Mast provides maximum lift height for safe and speedy stacking of any type of poultry modules onto the truck or trailer.

On site, your Truck-mounted Forklift is ready to get to work in less than a minute. Your MOFFETT Truck-mounted Forklift can be carried on the back of almost any truck or trailer with no loss of load space.

- No loss of load space
- Less damage & stress to poultry
- Higher productivity
- Quicker turn around between farm and processing factory
- Increased revenue
- Safe and easy to use
- Reliable
