

Moffett M9

Delivering **Confidence**

Moffett M9

For more than 40 years, Moffett has been manufacturing Truck-mounted Forklifts, a load handling solution that has helped transform the way materials are distributed across the globe. We have a reputation for creating solutions to logistics challenges across a diverse range of industries, ensuring that deliveries arrive on time, in perfect condition and at the most economic price.

Our innovative designs mean that a Moffett can be carried on the rear of a truck or trailer with no loss of load space. There is no more waiting for local off-loading equipment and means safer, faster and more cost effective deliveries.

> Why choose an M9?

The M9 range is designed to specifically cater for the poultry industry and the conditions faced when operating in areas with restricted headroom. With the ability to work on paved surfaces and firm, off-road conditions, the M9 range is invaluable to the industry through low overall height while the all-wheel drive ensures good maneuverability inside the poultry house.

Along with your new M9 Moffett Truck-mounted Forklift, you already receive numerous items of equipment as standard... giving you maximum value for your investment.

- Flashing beacon, safety belts and work lights for driver safety and confidence
- Differential Lock to get better grip when driving on rough terrain
- Oil Cooler to ensure engine reliability in the tough environment
- ROPS/FOPS (Rollover/Falling Object Protective Structure) to protect the driver
- Stabilisers to better handle the modules

> But that's not all...

With Moffett, an impressive range of optional extras is available. Whatever the application, we will match it with a customised solution. The M9 standard features can be enhanced with:

- Different tyre options
- Choice of forks
- Choice of lift heights
- Range of attachments

Our extensive service network, in more than 40 countries, offers you high levels of expertise, obtained through their long term link with Moffett and parent company Hiab. Our highly skilled service network team is used to solving just about any challenge. They understand your business and offer you the right advice regarding your load handling needs, be they resolved with a Truck-mounted Forklift or any other product in the Hiab range. Our centralised spares and parts service ensures delivery within 24 hours across Europe and only a few days longer for the rest of the world.

Our commitment to excellence goes beyond technical innovation. With our high quality production process and unparalleled sales and after-sales service, fast spare part deliveries, expert machine servicing and our global Moffett and Hiab dealer network, we all work together as a team to deliver confidence through our total customer care package.

In less than 1 minute, you are in complete control of the collection and delivery process. That's all the time it takes to mount and dismount your Moffett Truck-mounted Forklift.
